

Meeting 24: Objects

AN x64 PROCESSOR IS SCREAMING ALONG AT BILLIONS OF CYCLES PER SECOND TO RUN THE XNU KERNEL, WHICH IS FRANTICALLY WORKING THROUGH ALL THE POSIX-SPECIFIED ABSTRACTION TO CREATE THE DARWIN SYSTEM UNDERLYING OS X, WHICH IN TURN IS STRAINING ITSELF TO RUN FIREFOX AND ITS GECKO RENDERER, WHICH CREATES A FLASH OBJECT WHICH RENDERS DOZENS OF VIDEO FRAMES EVERY SECOND

BECAUSE I WANTED TO SEE A CAT JUMP INTO A BOX AND FALL OVER.

I AM A GOD.

Announcements

- HW6 due 11/17
- Project status due 11/17 (in your project repo)
- I'm traveling 11/27-12/1 (week after break)
 - Discuss expectations for project presentations
 - Research presentation examples

— wrapup for HW7!

Questions

- ① methods vs. functors
- ② liveness analysis
